# Contents

	<b>Page Number</b>
<b>Executive Summary</b>	<b>ix</b>
<b>1. Introduction</b>	<b>1</b>
1.1 Study Area	2
1.2 Developing the Master Plan	2
1.2.1 Stages of the Process	2
1.2.2 Study Structure	3
1.2.3 Initial Scoping of Master Plan	3
1.3 Previous Water Supply Studies	4
1.4 Summary of Consultation	5
1.4.1 Stakeholder Interviews – First Round Consultation	5
1.4.2 Second Round of Consultation	5
1.4.3 Public Consultation	6
<b>2. Water Resources on the Eyre Peninsula</b>	<b>7</b>
2.1 Surface Water	7
2.1.1 Introduction	7
2.1.2 The Tod River	7
2.1.3 Water Supply Catchments of the Spencer Gulf Basin	8
2.1.4 Water Conservation Reserves	9
2.2 Groundwater	10
2.2.1 Introduction	10
2.2.2 Literature Review	10
2.2.3 Southern Basins	12
2.2.4 Musgrave Area	12
2.2.5 Aquifer Characteristics	13
2.2.6 Robinson Lens	16
2.2.7 Port Kenny Lens	17
2.2.8 Penong Lenses	17
2.2.9 Coffin Bay Lenses	17
2.2.10 Other Groundwater Sources	17
2.2.11 Conclusion	18
2.3 Future Groundwater Allocations	21
<b>3. Existing Water Supply System and Demands</b>	<b>23</b>
3.1 Overview	23
3.2 Water Quality	25
3.3 Existing Water Demands	26
3.4 Water Network Model	26

## Contents (Continued)

	<b>Page Number</b>
3.5 Water Source Capacity	28
3.6 Limitations of Existing Water Supply Infrastructure	29
3.7 Water Conservation and Reuse Schemes	31
3.7.1 Port Lincoln	31
3.7.2 Wudinna	32
3.7.3 Streaky Bay	33
3.7.4 Ceduna	34
3.7.5 Elliston	34
3.7.6 Cleve	34
3.7.7 Cowell	35
3.7.8 Lock	35
3.7.9 Tumby Bay	35
3.7.10 Cummins	35
3.7.11 Coffin Bay	35
3.7.12 Tulka	36
3.7.13 Kimba	36
3.7.14 Minnipa	36
3.7.15 Smoky Bay	36
3.7.16 Penong	37
<b>4. Assessment of Future Water Demand</b>	<b>39</b>
4.1 Population	39
4.1.1 Introduction	39
4.1.2 Historical Overview	39
4.1.3 Population Projections	43
4.1.4 Summary	45
4.1.5 Demands Due to Population Growth	46
4.2 Potential Economic Developments	47
4.2.1 Preliminary Assessment of Economic Growth	47
4.2.2 Detailed Investigation of Selected Economic Developments	58
4.2.3 Economic Impacts of Development Opportunities	58
4.2.4 Water Demands for Economic Developments	76
4.2.5 Volumes of Water Required for Economic Developments	78
4.2.6 Summary	78
<b>5. Water Supply Solutions</b>	<b>81</b>
5.1 Regional Water Supply Solutions	81
5.1.1 Introduction	81
5.1.2 Future Water Demands	82
5.1.3 Assessment of Options	84
5.1.4 Power Requirements of Options	84
5.1.5 2.5 ML/day Desalination Plant	85
5.1.6 5.0 ML/day Desalination Plant	87
5.1.7 10.0 ML/day Desalination Plant	90

**Contents (Continued)**

	<b>Page Number</b>	
5.1.8	15 ML/day Desalination Plant	92
5.1.9	Establish Borefield at Kappawanta, Bramfield and Polda North	93
5.1.10	Establish Connection Between Morgan-Whyalla Pipeline at Iron Knob and Kimba	94
5.1.11	Artificial Catchments (for Rainwater Harvesting)	95
5.1.12	Augmentation Staging	96
5.1.13	Augmentation Scheme Costs	97
5.2	Water Supply to Streaky Bay	98
5.2.1	Introduction	98
5.2.2	Existing System and Water Quality	98
5.2.3	Augmentation Options	103
5.2.4	Financial Cost Analysis	103
5.2.5	Conclusion and Recommendation	104
5.3	Coffin Bay Water Supply	104
5.3.1	Introduction	104
5.3.2	Existing System and Demand	105
5.3.3	Future Demands	105
5.3.4	Augmentation Options	105
5.3.5	Conclusion	106
5.4	Specific Requirements for Economic Developments	106
5.4.1	Volumes of Water Required for Economic Developments	106
5.4.2	Uley Graphite Mine	107
5.4.3	Kaolin Mine at Poochera	107
5.4.4	Vineyards	108
5.4.5	Fish Processing	108
5.4.6	Aquaculture	109
5.4.7	Diamonds	109
5.4.8	Tourism	109
5.4.9	Costs for Supplying Water to Potential Economic Developments	109
5.4.10	Additional Developments (not included in economic analysis)	110
5.5	Other Solutions	112
5.5.1	Alternative Energy Sources for Water Treatment and Distribution	113
5.5.2	Increase Water Reuse and Recycling	114
5.5.3	Demand Management	115
5.6	Other Considerations	119
5.6.1	Delivery Capacity of The System and Augmentation of the Tod-Ceduna Pipeline	119
5.6.2	Integrity of Tod Reservoir Dam	119
5.6.3	Quality of Water in Tributaries of The Tod Reservoir	119
5.6.4	Tod Reservoir Inflow Capacity	120
5.6.5	Storage at Ceduna	121
5.6.6	Discharge of Brine Into Saline Aquifers	121

## Contents (Continued)

	<b>Page Number</b>
<b>6. Preliminary Assessment of Water Supply Options</b>	<b>123</b>
6.1 Criteria for Assessing Options	123
6.2 Assessment of Options	123
6.2.1 Reduce TDS to 500 mg/L - 1000 mg/L Maximum	123
6.2.2 Ability to Meet Demands for Specific Economic Developments	124
6.2.3 Minimise Whole of Life Costs (Present Value of Costs)	124
6.2.4 Acceptance by the Community	125
6.2.5 Minimise Environmental Impacts	125
6.2.6 Maximise the Ability to Stage Works and Minimise Operational Risk	125
6.2.7 Water Resource Sustainability (with Quantity and Quality Risk)	126
6.2.8 Summary	126
<b>7. Results of Preliminary Study</b>	<b>129</b>
<b>8. Detailed Assessment of Options</b>	<b>131</b>
8.1 Selection of Options	131
8.2 Selection of Augmentation Capacity for Assessment	132
8.2.1 Basis of Future Demands	133
8.2.2 Staging Scenarios	138
8.3 Results of Assessment	140
<b>9. Water Resource Sustainability</b>	<b>143</b>
9.1 Tod Reservoir	143
9.1.1 Reservoir Runoff Model	143
9.1.2 Reservoir Yield Model	144
9.1.3 Results	146
9.1.4 Augmentation Capacity	148
9.1.5 Analysis of Changes in Land Use and Practices	149
9.2 Conjunctive Use of Tod Reservoir and Groundwater Basins	151
9.2.1 Methodology	151
<b>10. Adopted Augmentation Option</b>	<b>157</b>
10.1 Alternatives to Additional Potable Water	157
10.1.1 Coast and Clean Seas Project	157
10.1.2 Demand Management	157
10.2 Proposed Potable Supply Augmentation Scheme	157
10.2.1 Tod Reservoir Augmentation Works	157
10.2.2 Other Augmentation Works	158
